Software Developer Engineer with 3.2 years of experience building scalable web applications in the Banking and E-commerce domains. Skilled in delivering clean UI, integrating APIs, and working across the full stack using React, Node.js, and MongoDB.

PROFESSIONAL EXPERIENCE

Software Development Engineer at Orangebits Software Technologies Pvt. Ltd., Pune (Jan 2023 – Present):

- Designed responsive and reusable UI components using **HTML5, CSS3, JavaScript, and Bootstrap**, ensuring cross-browser compatibility.
- Developed **scalable full-stack web applications using React.js, Node.js, and Express.js** with RESTful API integration.
- Implemented **secure authentication using JWT** and managed API testing with **Postman** for robust backend services.
- Optimized application performance and contributed to **deployment and maintenance of scalable applications**.
- Collaborated with **UX/UI designers and cross-functional teams** to enhance user experience and deliver user-friendly interfaces.

PROJECTS

Title : E-Commerce Web Application

Domain : E-Commerce / Web Application

Environment : React.js, JavaScript, Tailwind, Node.js, Express, MongoDB

Description :

Developed a full-stack e-commerce web application to enable users to browse, search, and purchase products seamlessly. Built responsive UI components using React.js and implemented features such as product listing, category-based filtering, type-based filtering, sorting and search functionality to enhance product discovery. Designed and developed backend APIs using Node.js and Express.js following MVC architecture, and implemented authentication and authorization using JSON Web Tokens (JWT) to secure user and admin operations.

Title : Digital Banking Platform

Domain : Banking / FinTech

Environment : React.js, JavaScript, HTML5, CSS3, REST APIs, Git

Description :

Developed a responsive digital banking platform for managing account details, transactions, and fund transfers. Built reusable UI components using React.js for dashboard, transaction history, and transfer workflows. Implemented features like transaction filtering, search, and real-time balance updates. Integrated frontend with backend APIs for account data, beneficiary management, and payments.
